Projects

Resort Booking Web Application

[View project](#)

- Developed a responsive resort booking web application using React.js.
- Built reusable components and implemented a clean, user-friendly interface.
- Used modern JavaScript (ES6) and React hooks for dynamic UI rendering.
- Ensured responsive design for mobile and desktop devices.
- Deployed the application on Netlify for public access.

Trending Aura | Frontend Web Application

[View project](#)

- Built a responsive frontend web application using HTML5, CSS, and JavaScript.
- Implemented JavaScript DOM manipulation and Fetch API to dynamically display trending data from external APIs.
- Designed mobile-first layouts using CSS Flexbox and Media Queries for cross-device compatibility.
- Focused on clean UI design and basic performance optimization.
- Deployed the project on Netlify for live access.

Personal Portfolio Website

[View project](#)

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and achievements.
- Implemented a mobile-friendly and user-friendly design ensuring smooth navigation across devices.
- Highlighted key projects and technical skills with an interactive interface to demonstrate practical web development expertise.
- Deployed the website on Netlify, gaining hands-on experience in hosting and deployment.
